

New Product Announcement

EMI Introduces New ECOMAX Series & ECO Series, Ductless Systems

April 16, 2025

Dear Valued Customer,

ECR International is announcing the introduction of a new product line of single-zone and multi-zone ductless mini-split systems (cold climate heat pumps). The new product line is the latest in ductless mini-split systems technology from EMI with R454B refrigerant.

The new **Premium ECOMAX Series** and **Value ECO Series** offer highly efficient temperature control for every kind of indoor space, delivering fine-tuned comfort. Designed with both installing contractors and end users in mind, these units are user friendly from the point of installation to end use.

The **ECOMAX Series** offer the most energy efficient cold climate ratings to qualify for utility and municipal rebates and ensure the highest quality of comfort. This series offers single-zone and multi-zone solutions with either a high wall air handlers or ceiling cassette air handlers.

The **ECO Series** offer a value priced temperature control solution. Also highly energy efficient, this single-zone solution is a great way to heat spaces where ductwork is impractical with an indoor highwall air handler and an outdoor condensing unit.

These products include weather resistant design for worry-free operation. A basepan heater to reduces ice buildup, “Gold-Fin” coating reduces corrosion, and a stainless-steel crankcase heater keeps the compressor oil warm. These two new lines from EMI provide flexible temperature control solutions for any application.

Pricing files can be downloaded from the ECR Customer Web Portal at <https://www.ecrcustomerportal.com>.

- If you have any questions regarding this product please contact your EMI Sales Manager, EMI Representative or call 1-800-325-5479.

As always, thank you for your continued business and support of the EMI product line.

Sincerely,

A handwritten signature in black ink, appearing to read 'Bob Shea'.
